

Contents

1. Overview of System Operator Responsibilities.....	1
1.1. Introduction.....	1
1.2. TSO in Norway.....	3
1.2.1. Regulating power, balance settlement and Ediel – effective systems	4
1.2.2. International cooperation brings down costs	4
1.3. TSO in Sweden	5
1.4. Cooperation between TSOs.....	5
1.5. TSO in Croatia	7
2. Network Access and Tariff Systems.....	9
2.1. Main principles for national grid tariffs	9
2.2. Collective pricing in the national grid – Norwegian case.....	11
2.3. The capacity charge – Swedish case	11
2.4. The energy part – Swedish case.....	12
2.5. Distribution tariffs in Norway	14
2.6. Transport tariffs in European countries	15
2.7. Electricity prices and network tariffs in Croatia.....	17
2.8. Lessons learned.....	19
3. Analyzing the Network Capacity and Flow	21
3.1. Croatian Case	22
3.2. Nordic Case.....	26
3.3. Grid Transit Analysis	28
3.3.1. Cross-border transits.....	28
3.3.2. Evolution in physical infrastructure	29
3.3.3. Access to interconnection / market zone	31
3.3.4. Network and regulatory activities	31
3.4. Lessons learned.....	32
4. Congestion Management and Cross-Border Arrangements	33
4.1. Congestion management.....	33
4.2. Bottlenecks and congestion management	36
4.3. Different methods of congestion management.....	36
4.3.1. Own interconnectors and channels.....	37
4.3.2. The "use-it-or-lose-it" principle	38
4.3.3. Explicit auctions	39
4.3.4. Implicit auctions	39
4.3.5. Market splitting, market coupling and price areas.....	40
4.3.6. Counter-trading.....	42
4.3.7. Redispatching.....	44
4.3.8. Combined solution in the Nordic region	44

4.4.	The Nordic power market – main principles.....	45
4.4.1.	Market developments between 1996 and 2000.....	45
4.4.2.	Weighing up the different methods used in the joint Nordic market.....	46
4.4.3.	Importance of locating bottlenecks correctly in relation to physical borders	47
4.4.4.	Dynamics and size in the price area structure.....	47
4.4.5.	The development of counter-trading.....	48
4.4.6.	Developments in relation to the opening up of the market in Europe.....	48
4.4.7.	The Nordic region within the single European market	49
4.5.	Cross-border arrangements.....	50
4.6.	Definitions	51
4.7.	Lessons learned.....	54
5.	Information in the Market.....	56
5.1.	Open information in the market.....	56
5.2.	Information about prices to end use customers in Norway.....	57
5.3.	Change of supplier – the number is open information	57
5.4.	Croatian case	59
5.5.	Lessons learned.....	60
6.	Spot price formation - function and process	61
6.1.	Basics	61
6.2.	EEX's Spot Market price formation	65
6.2.1.	The EEX Spot Market.....	65
6.2.2.	Closed auction.....	66
6.2.3.	Continuous trading.....	68
6.2.4.	The regulating power markets	69
6.3.	Borzen	72
6.3.1.	Day-ahead market.....	72
6.3.2.	Preferential dispatch trading (week-ahead auction)	74
6.4.	Opcom	74
6.5.	Nord Pool.....	75
6.6.	Lessons learned.....	77
7.	Balancing Market	78
7.1.	Balancing market function, process and operational tasks	78
7.2.	Balancing management and settlement in physical markets	79
7.3.	Regulating principles	80
7.4.	Roles and functions in operating the balance market.....	80
7.5.	Balance responsibilities	81
7.6.	Balance and regulating market bidding.....	82
7.7.	Self regulating.....	83
7.8.	Operational disturbances.....	83
7.9.	Balance Settlement	84
7.9.1.	Settlement between subsystems	84
7.9.2.	Settlement within subsystems.....	85
7.10.	Lessons learned.....	87

8. Products and Contracts in Physical and Financial Trade of Electricity.....	88
8.1. Bilateral physical contracts.....	88
8.2. Physical trading in the spot market - Elspot.....	89
8.2.1. Elspot market - types of bids.....	90
8.3. Financial trading and products.....	91
8.3.1. Futures contracts.....	91
8.3.2. Forward contracts.....	91
8.3.3. Contracts for Differences (CfDs).....	91
8.3.4. Option contracts.....	92
8.3.5. Examples of contracts.....	92
8.4. Lessons learned.....	93
9. Trading in Financial Markets at Exchanges.....	94
9.1. The Forward and Futures Markets on EEX.....	94
9.2. The Nord Pool Eltermin and Eloption financial market.....	96
10. Principles of Clearing.....	97
10.1. Typical clearing service.....	97
10.2. Clearing of financial electricity contract.....	98
10.2.1. Futures contracts.....	98
10.2.2. Forward Contracts.....	99
10.2.3. Option Contracts.....	99
10.3. Settlement.....	100
10.4. Clearing routines in Nord Pool.....	100
10.5. Lessons learned.....	102
11. Development Curricula.....	103
11.1. Short description of lessons.....	103
11.2. Daily and hourly schedule of lessons.....	105
12. References.....	107
13. Indexes.....	108
13.1. List of abbreviations.....	108
